

What is....

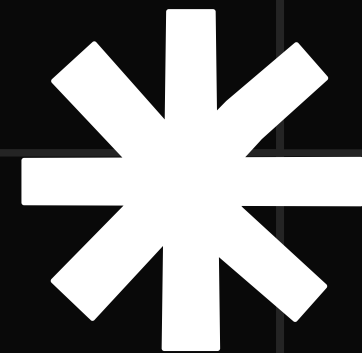

NAO interactive language teacher

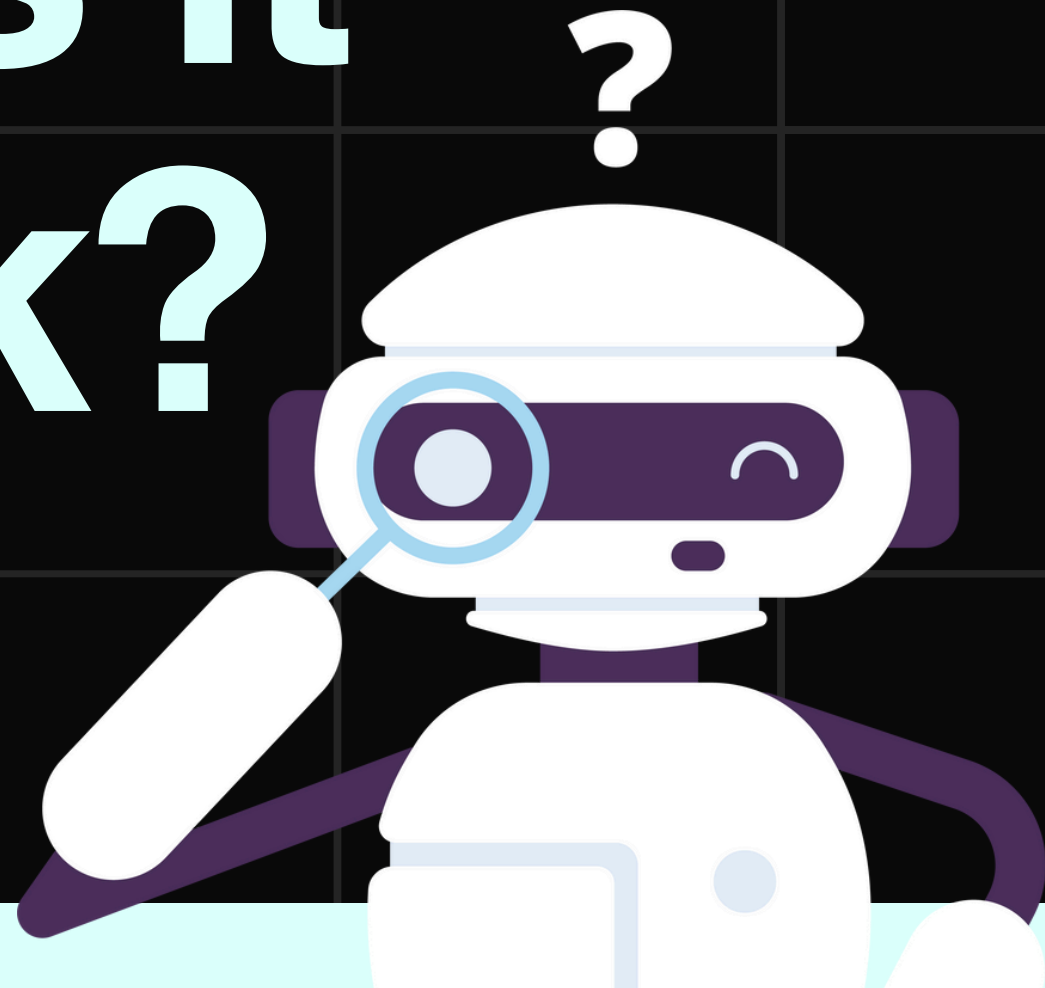

Presented by Group 3

- The NAO robot helps users learn a new language in an interactive and dynamic way.
- **It uses voice, movement, gestures, and its screen to deliver a fun and unique learning experience.**

How
does it
work?

Settings:

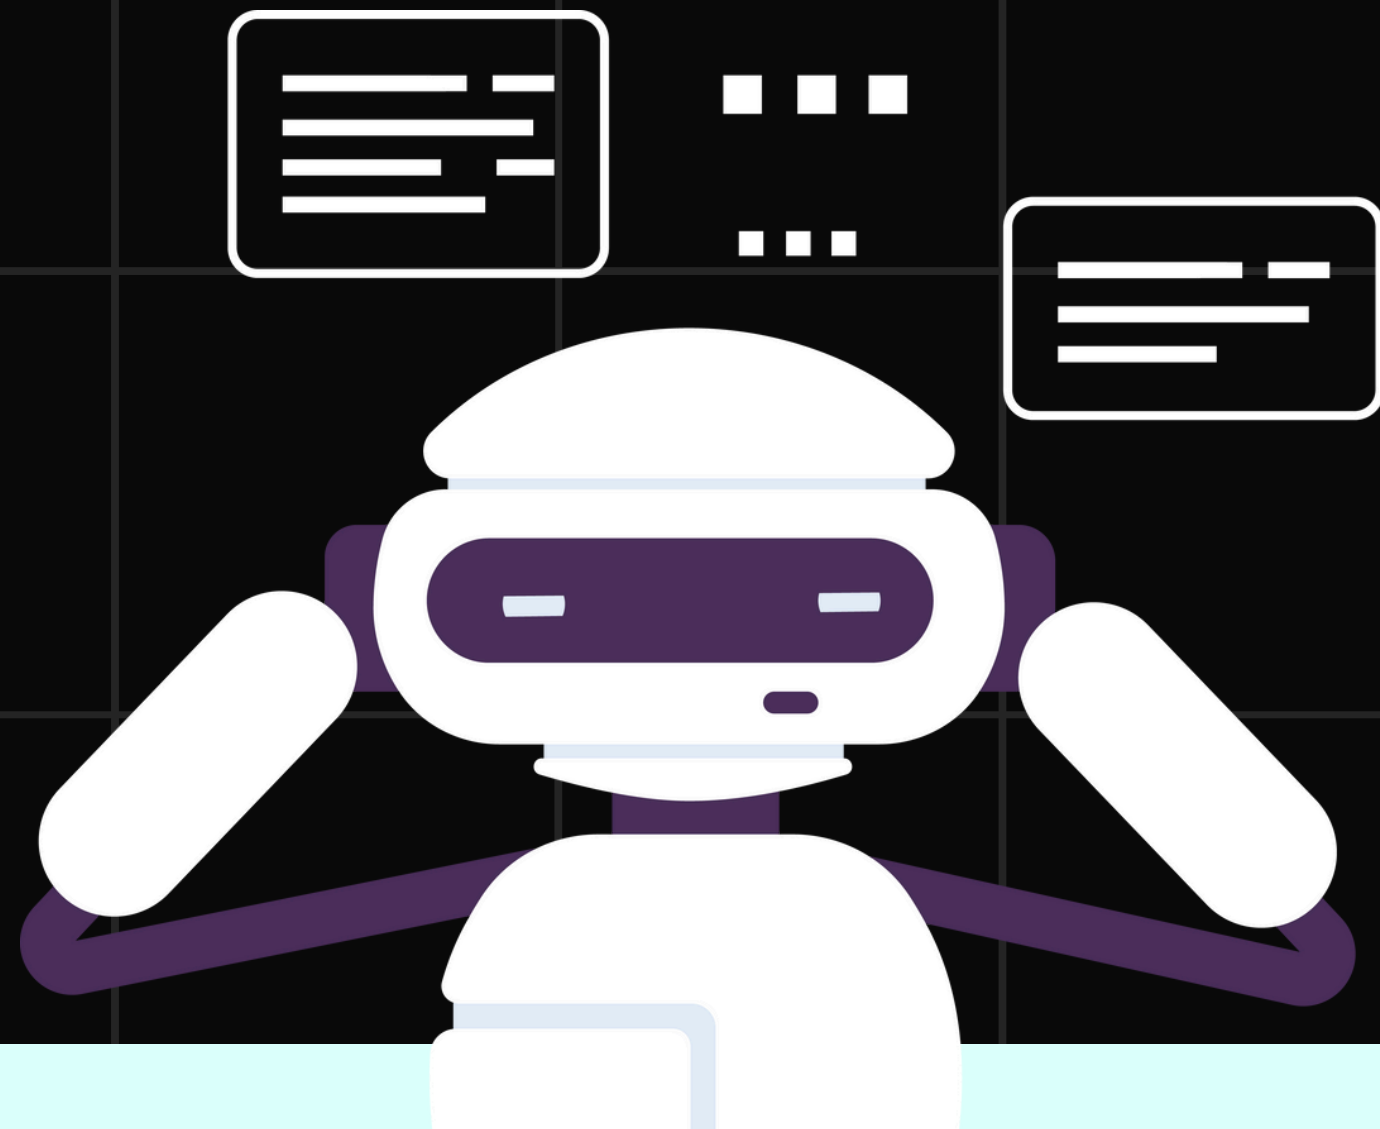

1. Choose a language: English, French, etc

Select a learning level:

1. Beginner, Intermediate, Advanced.
2. Set a daily study time.

learning time

Example: 40 Minutes

Listening (10 minutes)

- Play an audio clip
- Ask questions after the clip
- Use gestures to clarify the answers

Reading (10 minutes)

- Show a short story
- Ask the user to read it aloud
- Ask questions to check comprehension
- Use physical interaction to engage with the answers

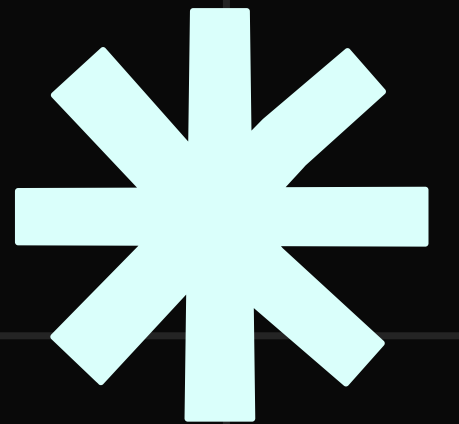

Conversation (10 minutes)

Display sentences on the screen

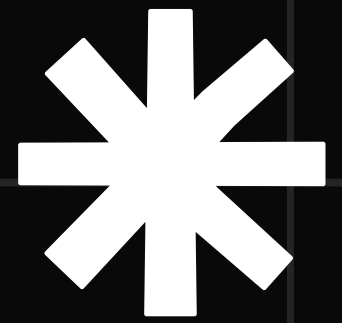

- Ask the user to pronounce the sentences
- Analyze pronunciation and give feedback
- Use clapping or head nodding as reactions

Writing (10 minutes)

- Display jumbled words on the screen
- Ask the user to arrange them into a correct sentence
- Provide hints using hand gestures
- Use lighting to indicate correct answers

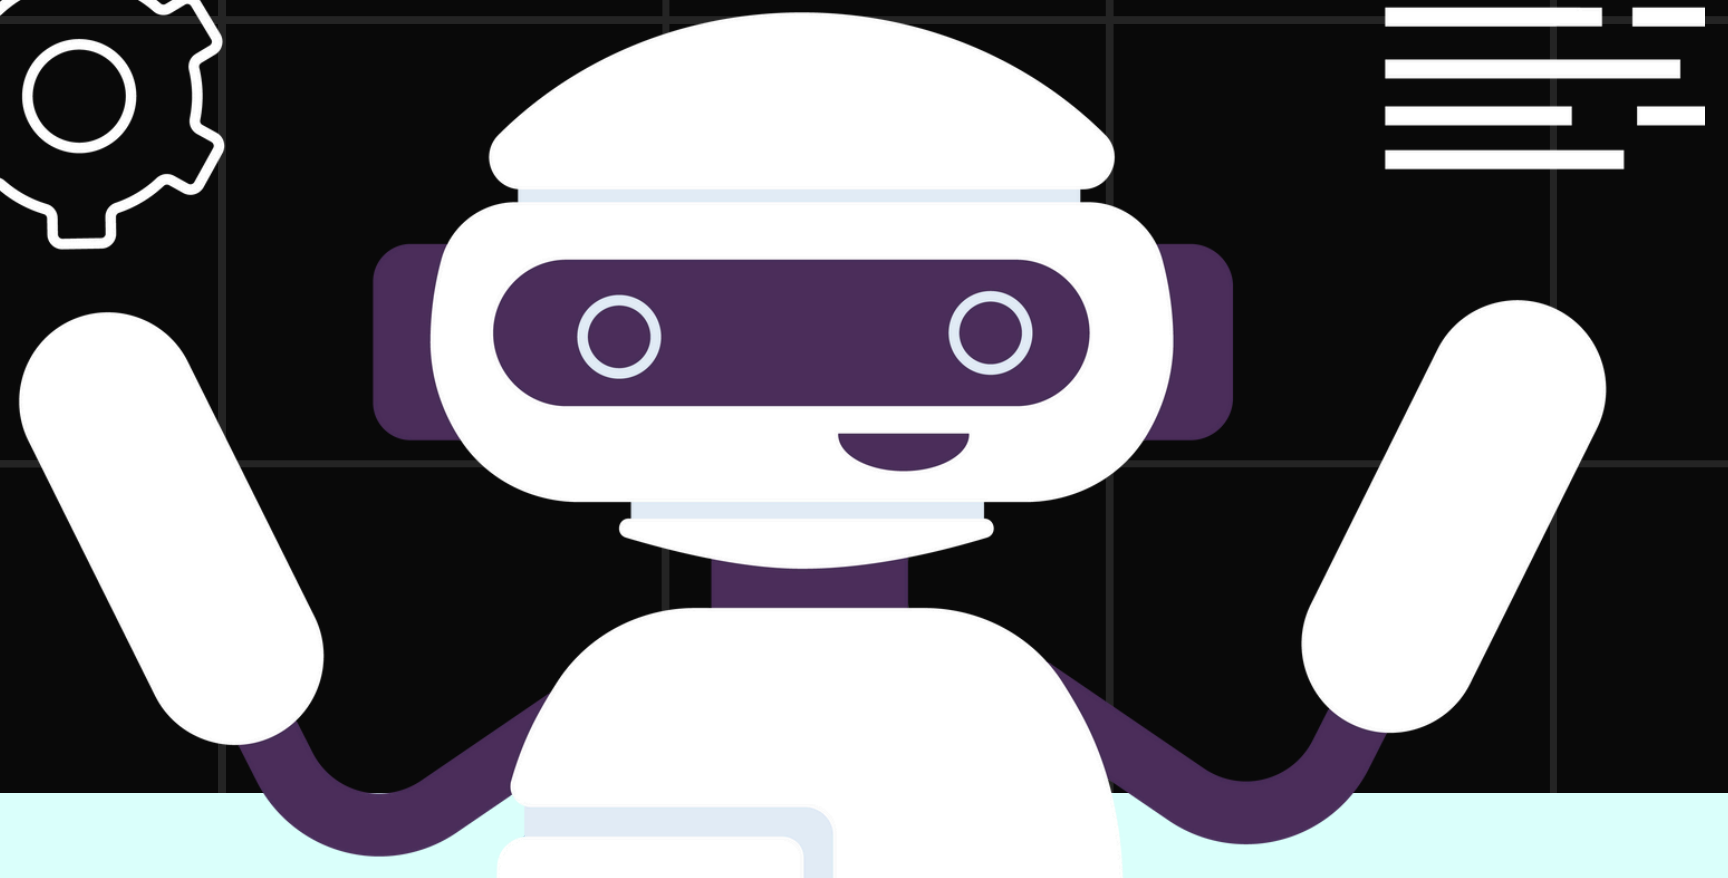

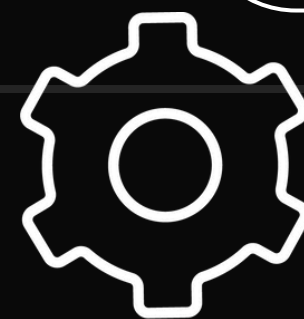

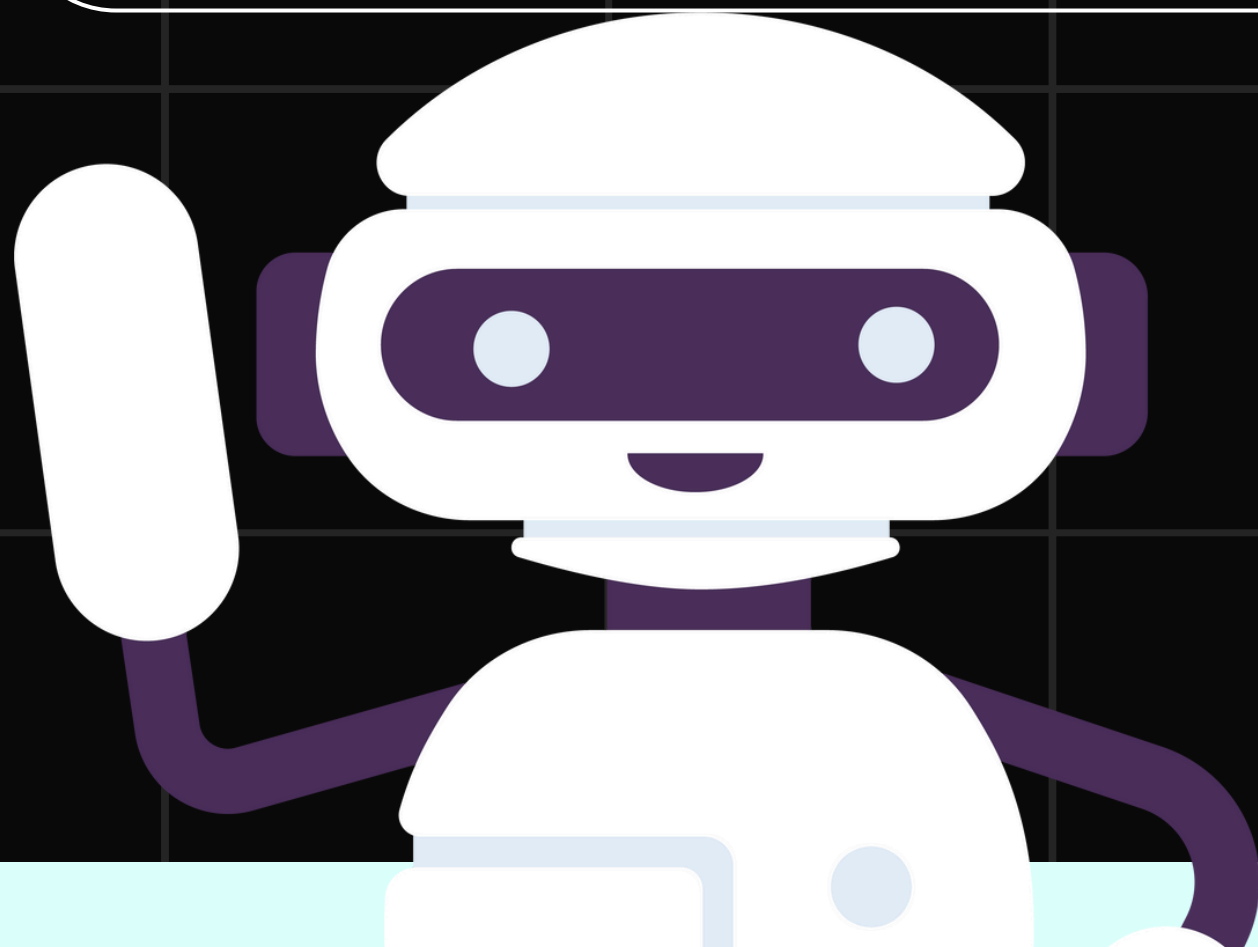

NAO's Physical Interaction

- Nods head to answer yes/no
- Raises hand when asking a question
- Claps for correct answers

- Moves and uses its body to motivate
- Repeats the question in a funny way if there's no answer

- **Multi-language Support:**

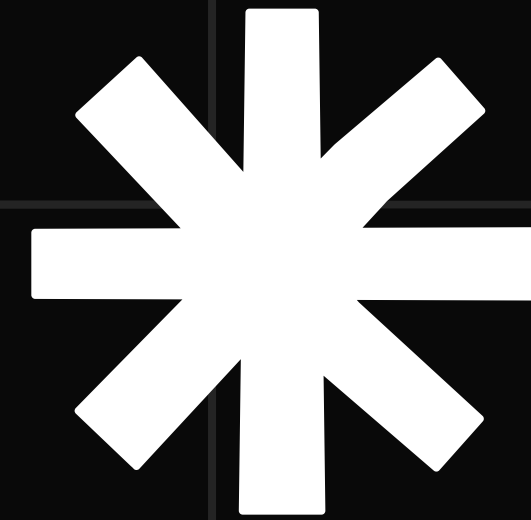

Can be programmed to teach multiple languages.

- **Learner Motivation:**

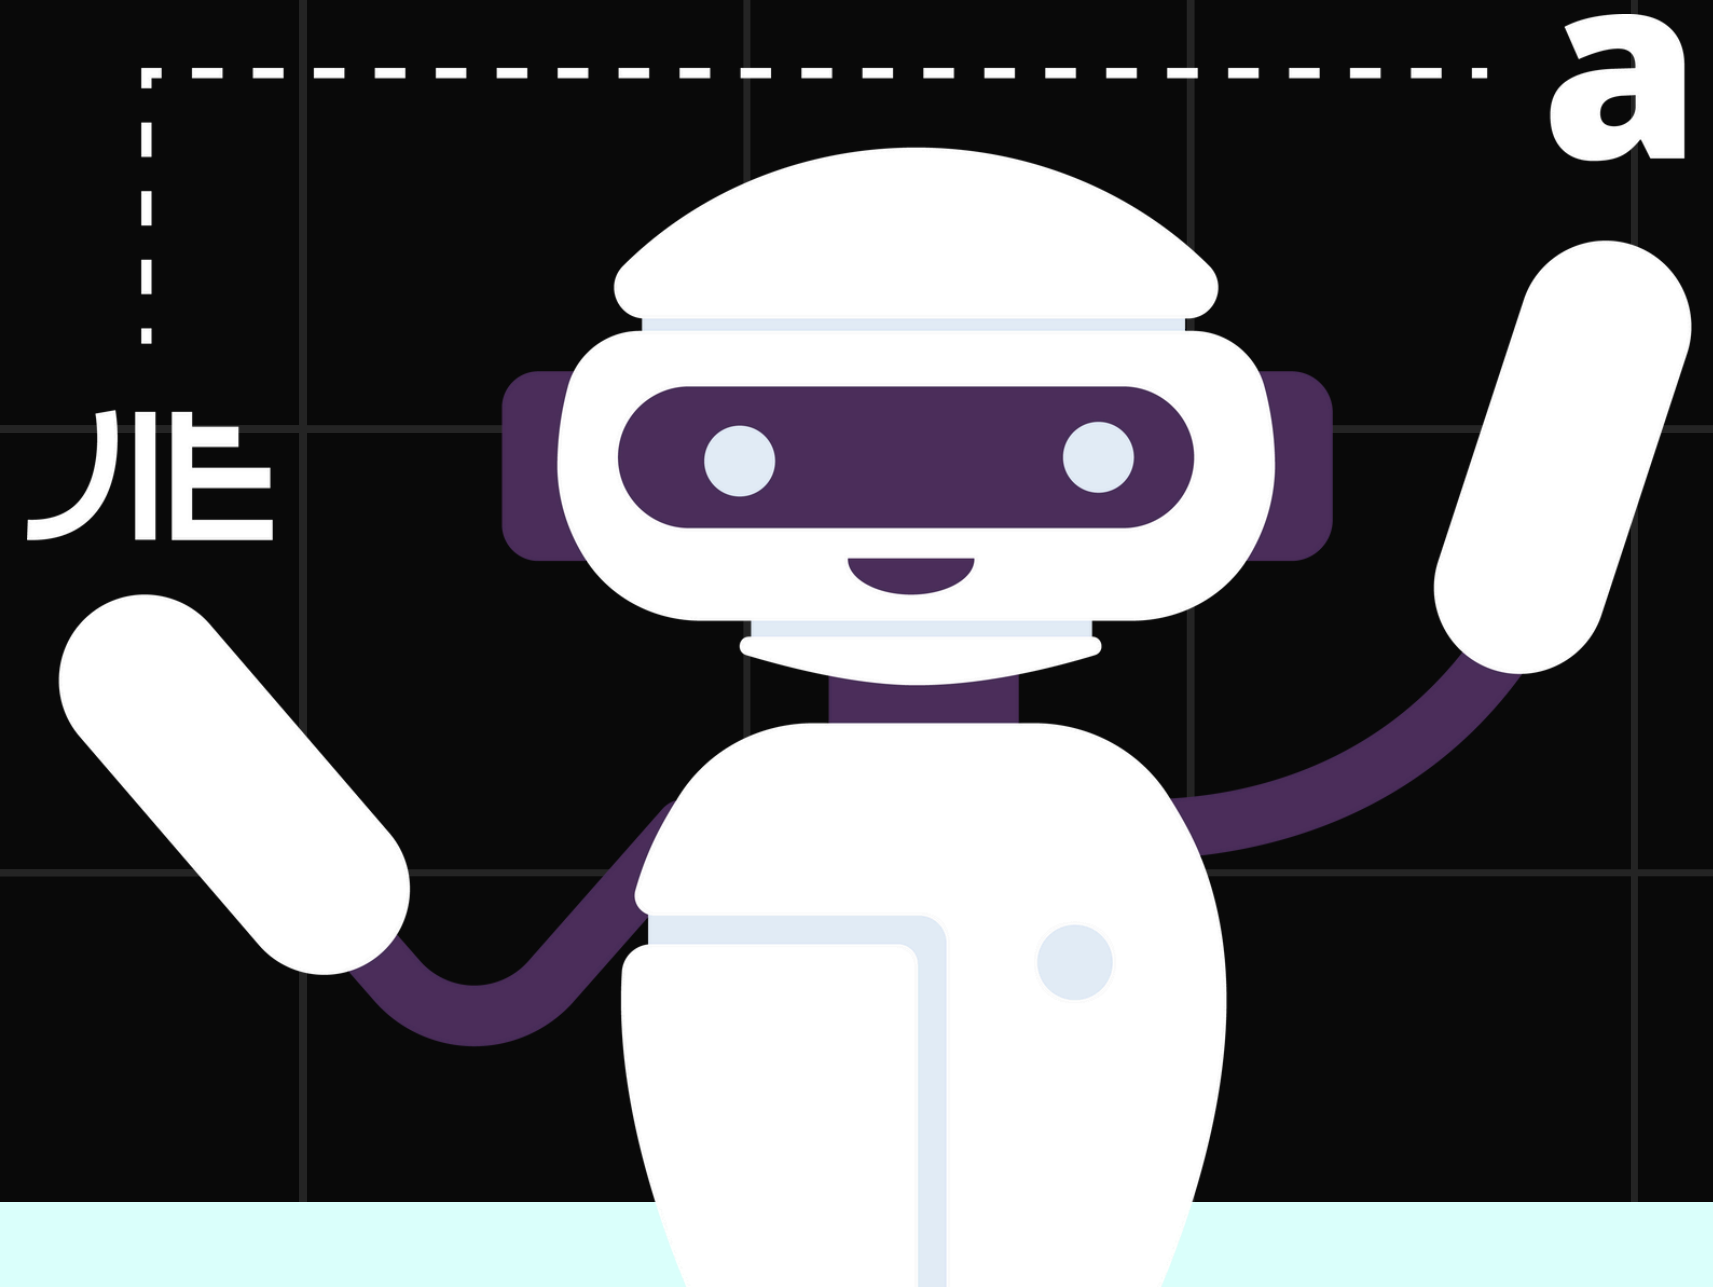

Boosts learning motivation through encouragement and interaction.

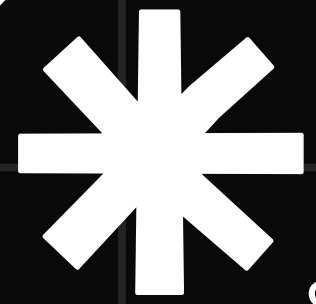

- **Easy to Use:**

Simple interface suitable for all age groups.

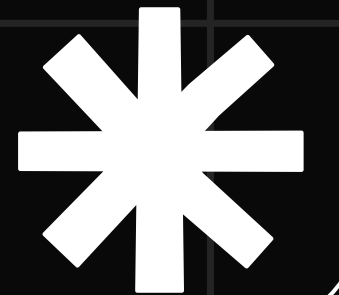

Features

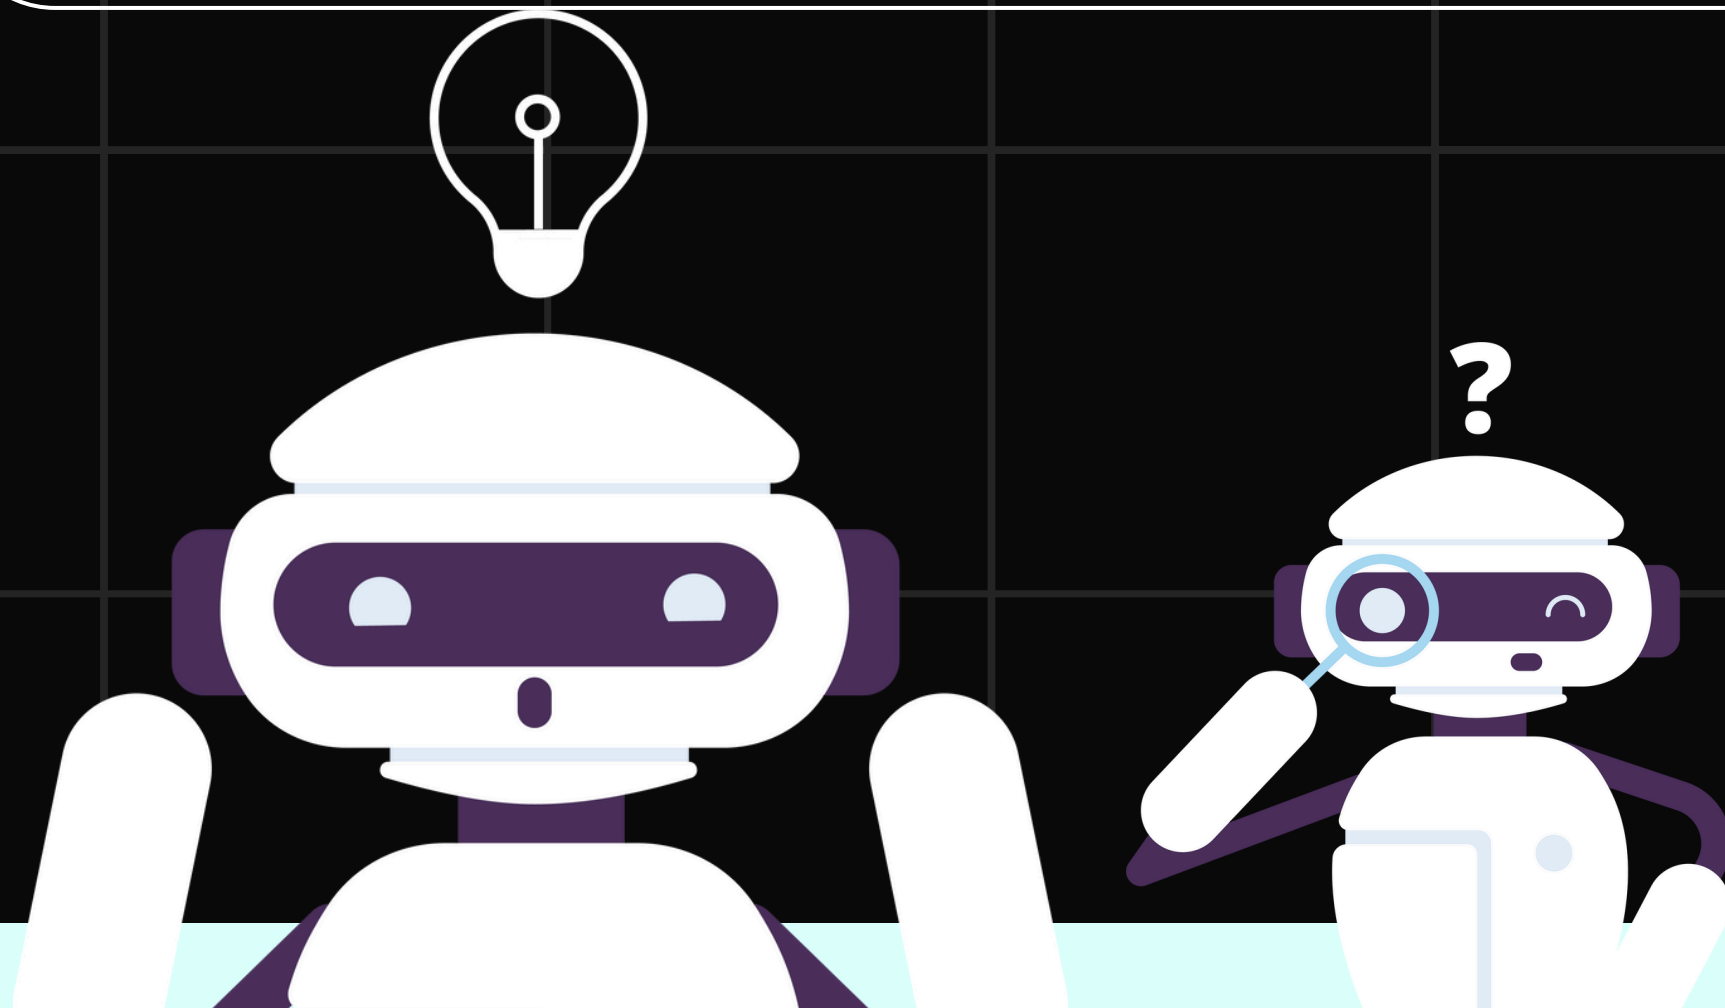

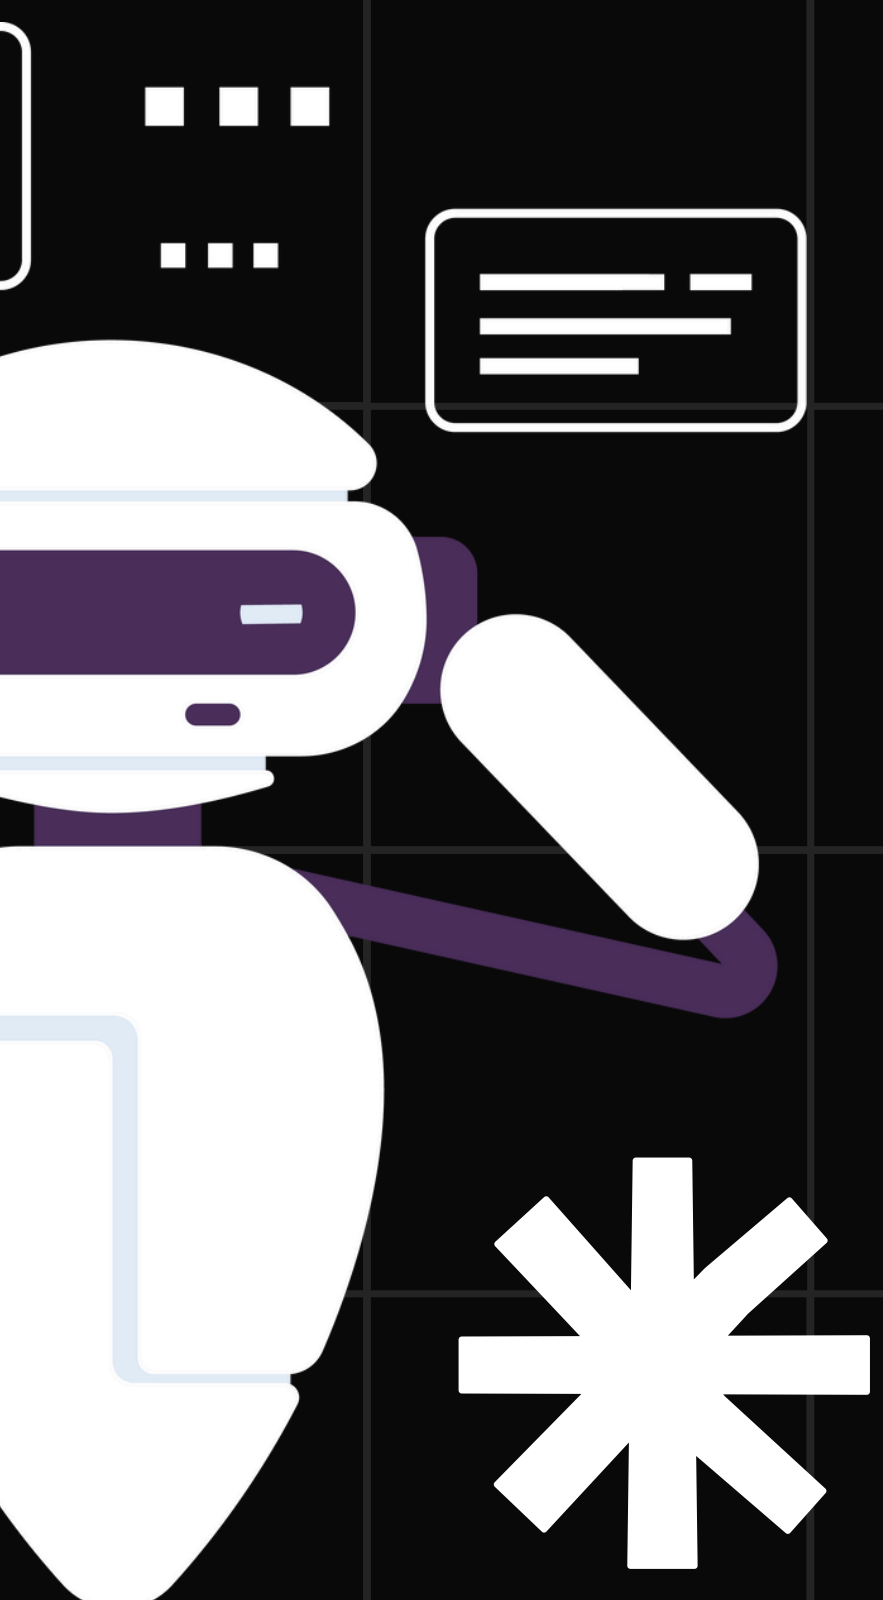

Reference and previous studies

Studies such as Mubin et al. (2013) and Belpaeme et al. (2018) have shown that social robots like NAO can enhance interaction and stimulate learning, especially among children. Experimental results also indicated that physical interaction with robots increases attention and comprehension, providing a strong foundation for using NAO in language education.

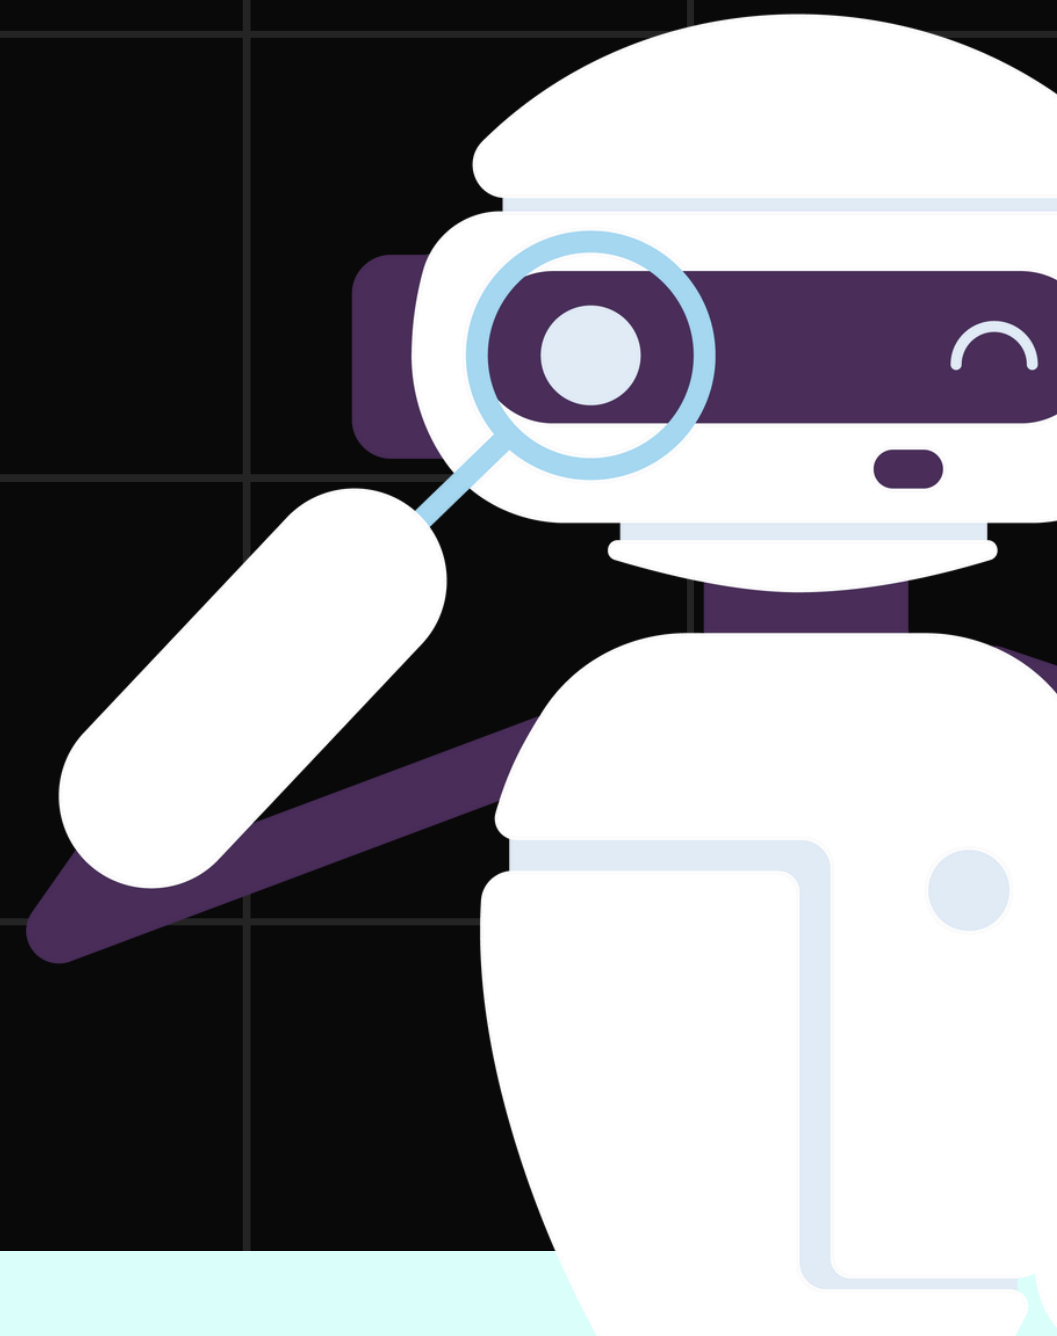

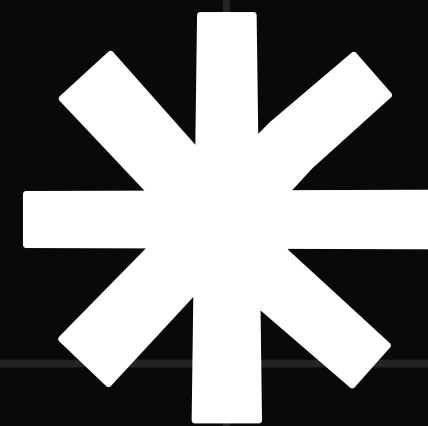

Studies and Research

A stylized white robot with purple accents is positioned on the left side of the slide. It has a rounded head, a visor, and a single arm extended. Above its head are three small white squares, and below it is a large white asterisk.
